

Manage & Secure the lifecycle of non-human identities

Non-Human Identity & Secrets Security Platform

The Need

Organizations have 50 times more non-human identities than human, Usually they hold high-permissions and are not govern by security teams.

- **Non-Human Identities are Everywhere.** R&D teams create and scatter non-human identities across different vaults, code, collaboration solutions, and more without any oversight or control by security teams.
- **Vaults are not enough** as they don't provide the much-needed context or protection.
- Non-human identity based breaches are among the top **two attack vectors** and the most **DESTRUCTIVE breach type to an organization.**

The Solution

Manage and secure the lifecycle of your non-human identities Entro puts an air tag on your secrets

From creation to rotation - we will find it, classify it, and safeguard it.

Inventory

Discover all NHI for a full inventory

Classification

Discover all NHI for a full inventory

Posture management

Avoid NHI and vaults risks & misconfigurations

Detection & Response

Avoid NHI and vaults risks & misconfigurations

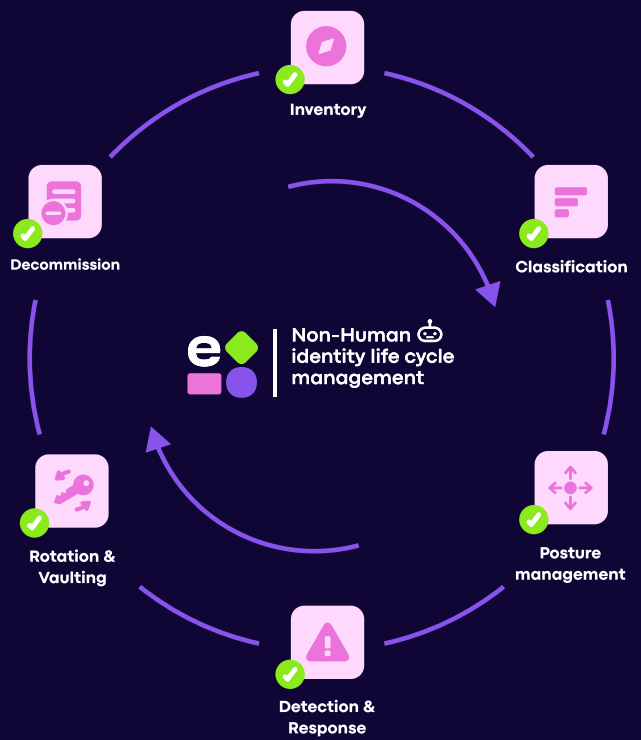

Rotation & Vaulting

Streaming rotation & make sure all secrets are vaulted

Decommission

Remove stale & unneeded NHI to reduce your attack surface

What are non-human identities(NHI)?

Programmatic access keys like service accounts, API-Keys, tokens, used by applications to access and authenticate against cloud services.

What to Expect

Reduce non-human identities risks, accelerate remediation and save the security and development teams time and money

- Govern any non-human identity from a single pane of glass - Proactively identify, prioritize, remediate and prevent risks compromising your business
- Visualize and track the activity of all non-human identity. Understand owners, permissions, misconfiguration, rotation and more
- Response in real time for any non-human identity abnormal behaviour that may indicate an attack
- Agentless and frictionless. R&D agnostic

Non-human identity protection designed for security teams
